

Literally looking inside the animal world, from turtles to triceratops, from the oesophagus of an octopus to the entrails of an elephant, this book uses illustrations to reveal nature's innermost workings. Each spread focuses on a different creature, getting under the skin to reveal what a camel really keeps in its hump, what a mosquito does with all the blood, and what happens to a rat after a rattlesnake has swallowed it whole. This book features a range of animals including sea creatures such as starfish and insects such as the bee. Additional illustrations compare the anatomy and physiology of each animal with mechanical equivalents - some real and some imaginary.

ICFA Continuing Education, Credit Analysis of Nontraditional Debt Securities, Safari Origami, Correct System Design: Symposium in Honor of Ernst-Rudiger Olderog on the Occasion of His 60th Birthday, Oldenburg, Germany, September 8-9, 2015, Proceedings (Lecture Notes in Computer Science), Solutions Manual, Historic Christ Church, New Bern, North Carolina, 1715-1977: Based on seven Sunday morning lectures November 6-December 18, 1977, during the second term of adult education programs, Terminating Psychotherapy: A Clinicians Guide, Santa Barbara: Paying the Price (Part 3), Astronomical Spectroscopy: An Introduction to the Atomic and Molecular Physics of Astronomical Spectra (2nd Edition), Teach Your Child: Homophones Vocabulary Builder 1 - Mobile Learning Help for Active Parents (Teach Your Child and Yourself Homophones),

A voyage of discovery through the living, breathing innards of a whole ark full of creatures. See what a camel really keeps in its hump, what a mosquito does with .

Whales and Sharks and Other Creatures of the Deep. New York: Simon & Schuster, Parker, Steve. Inside the Whale and Other Animals. New York.
