

The tomb of Tutankhamun (Tut.ankh.Amen), uncovered by the fifth Earl of Carnarvon and Howard Carter in November 1922, was the greatest archaeological find the world has ever seen. Though superficially plundered by thieves in antiquity, the burial remained intact, surrounded by a mass of funerary equipment arranged in three peripheral chambers. The Tomb of Tut.ankh.Amen: The Burial Chamber was originally published in 1927 as the second volume of Carters trilogy. It records the work of the second and third seasons at the tomb: the opening of the four protective shrines; the discovery within of Tutankhamuns quartz-sandstone sarcophagus; the extraction of the kings three anthropoid coffins (the innermost of solid gold); and the final examination of the pharaohs mummy.
